Other: 23000 Elazığ (Türkiye)

ABOUT ME

I've been developing mobile app with Flutter since June 2020. I developed 10+ web applications with Django and rest api with DRF. Apart from that, I developed a web application in microservice architecture with Java Spring Boot because I was curious about other technologies. I used the following technologies while developing this project. PostgreSQL, Docker, Redis, Elasticsearch, MongoDB.

WORK EXPERIENCE

Mobile Application Developer

Netcad [26/08/2022 – Current]

City: Ankara

Country: Türkiye

At Netcad, the mobile application development team develops unique applications such as Netigma Nfield NDU. In this team, I am developing a mobile application with Flutter. I am also responsible for store installation of apps.

Mobile Application Developer (Flutter)

Digital Transformation and Software Office at Firat University [31/01/2022 – Current]

City: Elazığ

Country: Türkiye

In the digital transformation and software office, various applications belonging to Firat University are developed. Here, I have developed a mobile application that will allow students to see our university's news, announcements, and events in a single application, and that includes the map of the university. By choosing the student's own section, I added a special push notification feature to the section. I used the MVVM architecture when developing the application. If you're wondering about the structure I used in the project, you can check out my projects section.

Reference : Lecturer Hakan GULER (<http://ddyo.firat.edu.tr/en/admin-staffs>)

You can find the application I made at this link.

Mobile Application Developer (Flutter)

Favrea [30/09/2021 – Current]

City: Ankara

Country: Türkiye

I worked with the team that released applications for both iOS and Android with Flutter. I write 40% of the application.

Web application developer

T3 Foundation [31/01/2020 – 31/10/2021]

City: Istanbul

Country: Türkiye

We have developed some web applications using Django and Django Rest Framework. I wrote sites that were previously written with html css js php with Django to be more useful. I also customized the admin panel for each of them.

Freelance Mobile Application Developer (React Native)

Prodrom ICT Solution [26/04/2022 – Current]

City: Elazığ

Country: Türkiye

In this company, I worked with the team that developed the application of Maltepe Municipality using React Native.

Software Engineering

Firat University [18/08/2019 – Current]

Address: City center / Elazig, 23000 Elazig (Türkiye)

Website: firat.edu.tr

LANGUAGE SKILLS

Mother tongue(s): **Turkish**

Other language(s):

English

LISTENING B2 READING B2 WRITING B2

SPOKEN PRODUCTION A2 SPOKEN INTERACTION A2

DIGITAL SKILLS

Microsoft Word / Flutter Framework / Flutter Dart / Python, Django, Asyncio / Mobile development / Web Development and Web Design / Programming (C, Java, Python, OCaml, OpenGL) / Programming Languages: Java, C, Kotlin, C#, Javascript / Docker CLI / GIT & Github / Canva and GIMP

PROJECTS

Firat Mobile

[31/01/2022 – 14/03/2022]

I used the MVVM architecture when developing the application. I used Mobx as state management and I used Provider as a helper tool. I added language support and dark theme support to the application. I saved the data I got from the api in local storage with the Cache manager I wrote myself so that it can be used without an internet connection. I used Dart Isolate where necessary.

For teaser: <https://www.youtube.com/watch?v=fl7Xm2czA0U>

Favrea

[09/11/2021 – 31/01/2022]

We used the MVC architecture when developing the application. We used GetX as state management. We added language support to the application. Soon in stores.
